

RAYMOND
FEGHALI CO.
FOR TRADE AND INDUSTRY

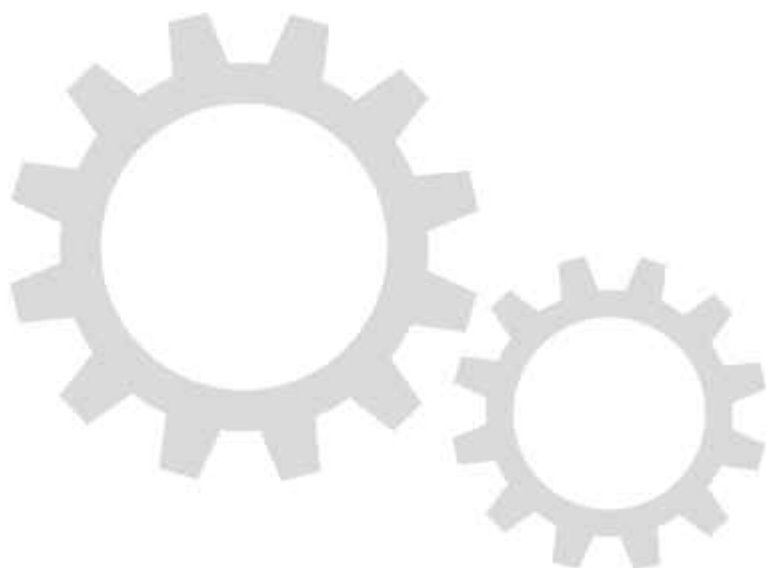

The background features a large, stylized gear mechanism on the left side, with various sized gears and concentric circles. On the right side, there are several parallel lines that resemble a circuit board or data bus, extending from the gear area towards the right edge. Below the main text, there is a grid of small dots arranged in a pattern that tapers to the right.

THE COMPANY

The foundation of any industry starts here, in the heart of a legacy of industrial excellence. Welcome to RTF - Raymond Feghali Company. Founded in 1972 by Mr. Raymond Feghali, we lead in industrial solutions, evolving from manual transmission to the most cutting-edge electro-mechanical and automation parts. With a vision for further growth, Mr. Fadi Feghali, alongside a qualified team, joined the company in 1997, continuing our tradition of revolution and quality in the industry.

As part of our expansion strategy, we established a new partnership in 2011 with APT in Accra. Marking a significant step forward in serving different markets, our sister companies were founded in subsequent years: GIC in Kinshasa in 2019 and ELEMEC in Abidjan in 2021. Over the years, we have evolved and grown, while adapting to the changing needs of the market. With a history spanning five decades, we continuously expand our operations with 7 specialized departments, each dedicated in ensuring comprehensive solutions to meet every need.

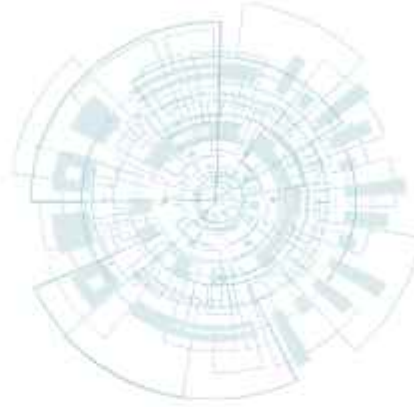

At the core of our success, stands a strong commitment to our values: integrity, excellence and customer satisfaction. Our commitment extends beyond sales & strategies, towards environmental sustainability by shifting to clean energy, ensuring that every aspect of our operations contributes positively to the planet. Our mission is simple: to provide innovative and effective solutions to the most complex industrial projects. These principles guide us in every work, driving us to deliver exceptional results.

Our greatest asset is our team of highly skilled professionals, equipped with knowledge and expertise, ensuring superior quality and delivering optimal results. With a proven record of delivering success across Lebanon, our expertise extends beyond borders, supporting our clients in the Middle East and Africa region.

From a diverse portfolio of projects to a wide range of products, our commitment to quality and reliability is our priority. Join us as we continue to shape the future of industrial trade!

THE FOUNDATION OF ANY INDUSTRY STARTS HERE

We provide high-performance and reliable industrial automation solutions tailored to your specific needs. Our comprehensive portfolio encompasses a diverse range of components and systems, including PLC, VFD, motion control systems, industrial control and communication solutions, human-machine interfaces (HMIs), and robotic solutions. We offer comprehensive information monitoring and management systems, such as SCADA and power management software to facilitate the implementation of complete smart manufacturing solutions.

SMART RELAYS

Empower your electrical projects with our one-stop shop for control and protection essentials: MCBs, MCCBs, and reliable contactors. For motors protection we offer Dedicated thermal overload relays and high-quality terminals for secure connections. Safety and precise positioning are met with our robust limit switches. This comprehensive range allows you to build dependable and fully protected electrical systems.

PUMPS AND FANS

F

Every industrial process has its unique needs. That's why we provide a vast range of industrial fans and pumps, from high-powered blowers for heavy-duty tasks to precise flow control pumps for delicate operations. We can tailor a system to meet your specific requirements and keep your operations running efficiently.
